To whom it may concern

Notification of product improvement - ground rack KRGF1-1000

We will implement a change in the specification of following KHK standard gear product which we have produced and sold for long time in order to create a more convenient product and to standardize the shape.

Therefore we herewith would like to inform you of following details in advance.

KHK as part of our ongoing policy of continuous improvement of production processes and product quality as we have pride ourselves on supplying valuable products, which can be used by all of our customers safely. Thank you in advance for your understanding.

Note

1. Applicable product

Ground rack - KRGF1-1000

2. Specification to be modified

Before change - overall height of rack = 20mm

After change - overall height of rack = 15mm

3. Reason for Change

The currently produced KRGF1-1000 cannot be butted end-to-end with the KRG1 and KRGD1 racks due to a difference height of the two styles of rack.

The KRGF1-1000 after the change can be butted end-to-end with the KRG1 and KRGD1 easily due to the common height.

4. Releasing date of modified product

The new height rack will be released after March 21, 2010.

Please refer to the KHK Updates page on the KHK website for details:

<http://www.khkgears.co.jp/en/>

5. Availability of old version:

Old version (original version) of KRGF1-1000 without the change in height can be ordered until December 20, 2010.

Please check product height carefully when you place an order.
